

FINISH

Instructions for Snakes and Ladders:

You will need to mould:

- 1 Dice
- 4 to 6 playing pieces
- Ladders
- Snakes

1. Create all the items above and then place your playing pieces on the start square and the ladders and snakes can be placed anywhere you choose.
2. The first player to roll the number 1 can take their turn first, the players will then go around in a circle and roll the dice once each turn.
3. The players will each move their playing piece depending on which number the dice shows. If they land on a snake's head, they have to go down to where their tail is. If they land on a bottom of a ladder, they get to climb to the top.
4. The first player to reach the Finish square will be crowned the winner of the game, but they have to roll the correct number of squares to finish.
